Experience

REGGORA

Boston, MA

Head of QA

Jan '21 - Present

- Oversee and manage all activities of the quality assurance team.
- Collaborates with functional teams inclusive of software/product development to establish, implement, and maintain compliance in quality assurance processes so the team can ship high quality products.
- Identify and road map champion initiatives that can amplify impact and efficiency when it comes to proactively solving issues before they arise. For example, improving the company's Software Development Life Cycle through workflow and testing automations.

Full-Stack Developer

Jan '20 – Jan '21

- Designs and implements robust and scalable software that adds new functionality for Reggora's products and platform in a timely manner.
- Engages in all aspects of the release cycle including identifying gaps in requirements or designs and present options to address them, work estimation, implementation, testing, and review.
- Interviews potential full-stack developers and QA engineers. Helps onboard new employees.

Lead QA Engineer

Jun '19 - Jan '20

- Ensures that the engineering team has a smooth release by managing QA resources, resolving disputes and confusion if tickets are blocked, and keeping an open line of communication with the team so we can meet deadlines.

QA Engineer

Apr '19-May '19

- Created detailed, comprehensive and well-structured test cases and automated test scripts for integration, regression and functional testing on mobile (iOS & Android) and web platforms
- Tested product usability, compatibility, security, accessibility, and performance for consistent user experience.
- Proposed several QA and tech infrastructure changes that boosted the company's overall workflow, transparency and decreased ambiguity within a product's lifecycle.

DANA-FARBER CANCER INSTITUTE

Boston, MA

Clinical Administrative Support Specialist

Mar '15-Sep '19

- Gatekeeper for all weekend infusion appointments. Normalized weekend clinical workflow by creating, analyzing, and implementing changes from 5+ reports per week for all oncology departments. Helps direct clinic and infusion workflow of up to 300+ patients daily through call triage, front desk check-in, and check-out functions.
