Experience

REGGORA   Boston, MA

Full-Stack Developer   Jan '20 – Present
- Designs and implements robust and scalable software that adds new functionality for Reggora's products and platform in a timely manner
- Engages in all aspects of the release cycle including identifying gaps in requirements or designs and present options to address them, work estimation, implementation, testing, and review
- Interviews potential full-stack developers and QA engineers. Helps onboard new employees.

Lead QA Engineer   Jun '19 - Present
- Ensures that the engineering team has a smooth release by managing QA resources, resolving disputes and confusion if tickets are blocked, and keeping an open line of communication with the team so we can meet deadlines.

QA Engineer   Apr '19-May '19
- Created detailed, comprehensive and well-structured test cases and automated test scripts for integration, regression and functional testing on mobile (iOS & Android) and web platforms that increased code coverage by 35% in a span of 2 months
- Tested product usability, compatibility, security, accessibility, and performance for consistent user experience
- Proposed several QA and tech infrastructure changes that boosted the company's overall workflow, transparency and decreased ambiguity within a product's lifecycle

DANA-FARBER CANCER INSTITUTE   Boston, MA

Clinical Administrative Support Specialist   Mar '15-Sep '19'
- Gatekeeper for all weekend infusion appointments. Normalized weekend clinical workflow by creating, analyzing, and implementing changes from 5+ reports per week for all oncology departments.
- Helps direct clinic and infusion workflow of up to 300+ patients daily through call triage, front desk check-in, and check-out functions.

THINKFUL   Boston, MA

Web Development Teaching Assistant   Apr '19-Aug '19
- Work with students one-on-one and addresses issues they are having with the course material (JavaScript, jQuery, version control) and assisted instructors in teaching the workshop.
